| MANUFACTURING      | HARMFUL EMISSIONS                   | Thanks to continual investments made during our ceramic tile production, Caesar has been able to purify and recycle water used in our manufacturing processes and reduce the waste of this precious natural resource.  100% products manufactured using natural raw material such as clays, quartz, feldspars, kaolin and natural dyes The absence of hazardous substances such as lead and cadmium reduces or eliminates the health risks to those who work in the production department, and to those who live in spaces tiled with our products.  100% recycling of ceramic waste before the firing production phase of our tiles  Caesar recycles its un-fired ceramic tiles which do not meet our quality standards; this practice significantly reduces the need for raw materials and resources extracted from our planet.  100% potential recycling of packaging materials  The packaging materials used for our products as well as the majority of our marketing materials can be almost completely recyclable as they are made of paper, cardboard, wood and plastic.  100% potential recycling of "fired" ceramic tiles  The "fired" production ceramic tile waste which is not re-introduced into our production process is recycled as gravel for pavements during the construction of public roadways and by-passes.  Caesar uses "FAO pallets" for freight shipments where required  Our use of this specific type of pallet reduces the risk of contamination in countries importing our ceramic tile products and is in compliance with ISPM-15 FAO.  Minimum release of polluting substances in the atmosphere  The investments made in the most up-to-date exhaust filtering systems reduce the environmental impact of the productive process to the minimum, thus protecting nature.  Energy saving  The investments in innovation mean that energy consumption during the firing phase is reduced to the minimum. |
|                    | LOCATION OF MANUF. PLANT            | Italy  |
|                    | TESTS/CODES                         | http://www.caesar.it/images/File/schedetecniche/absolute.pdf   |
|                    | 3 <sup>RD</sup> PARTY CERTIFICATION | Iso 14001, Ecolabel, Iso 9001  |
| INSTALLATION       | INSTALLATION PROCEDURE              | Step 1: Surface Preparation, Step 2: Layout, Step 3: Applying Adhesive,  |
|                    | INSTALLATION ADHESIVES              | Step 4: Cutting Tile, Step 5: Setting Tile, and Step 6: Grouting Joints  Select the right adhesive for the substrate you're using. Carefully read and  |
|                    |                                     | follow all instructions and precautions on the adhesive or mortar package.   |
|                    | UNIT COST                           | Under \$4.99   |
|                    | LIFE CYCLE ANALYSIS                 | Porcelain tile can last much longer than soft surfaces, as well as all other   |
|                    | EXTRACTION                          | hard surfaces, it won't likely be replaced for decades.  |
|                    | END OF SERVICE LIFE                 | Tile may be recycled see above information   |
| MISC. PROPERTIES   | QUALITIES/PROPERTIES OF PRODUCT     | Since 1988 Caesar has been synonymous with top quality porcelain stoneware, the perfect union between technology performance, functionality and aesthetics.  |

|-----------------|-----------------------------|---|
|                 |                             | Caesar's porcelain stoneware is distributed in over 80 countries throughout the world. It is used both for flooring and cladding in |
|                 |                             | installations and projects of diverse natures.  |
|                 |                             | "Where material becomes culture" is a company philosophy that, starting   |
|                 |                             | with research and thorough knowledge of the material, means mastering it  |
|                 |                             | and making it distinguish all Caesar products.  |
|                 |                             | "Where material becomes culture" means selecting and using only the   |
|                 |                             | best raw materials from different parts of the world.   |
|                 | MISC. COMMENTS              | The culture of respect for the environment at Caesar is best summed up  |
|                 | MISC. COMMENTS              | by the project "Caesargreen", the mission to minimise the impact on the   |
|                 |                             | environment and to develop industrial eco-sustainability. The highly  |
|                 |                             | advanced technology at Caesar safeguards the path of eco-sustainability   |
|                 |                             | that the company, amongst the first in the world to win awards for "eco-  |
|                 |                             | friendliness", strongly wanted to go down: Caesar were the first ceramic  |
|                 |                             | tile manufacturer in the world to be awarded ISO 14001 certification, the   |
|                 |                             | first in Italy to be granted permission to use the Ecolabel logo and tiles  |
|                 |                             | manufactured by Caesar have been deemed of the quality to pass the  |
|                 |                             | stringent and prestigious LEED rating system, which means that the  |
|                 |                             | Green Building project is achievable. The Caesargreen brand epitomises  |
|                 |                             | Caesar's promise towards man and the environment and this brand will be   |
|                 |                             | used on all communication tools as the statement that the company is  |
|                 |                             | putting   |
|                 | CONTRIBUTION TO LEED POINTS | RECYCLED CONTENT MR 4.1, VOC CONTENT EQ 4.2, HEAT ISLAND  |
|                 |                             | EFFECT SS 7.1, INNOVATION IN DESIGN ID 1.1-1.4  |
|                 |                             | For more than twenty years, Caesar's philosophy of "Where Material  |
| COMPANY PROFILE | GREEN PHILOSOPHY            | Becomes Culture" has become widespread and is undeniably linked to  |
|                 |                             | our proud heritage of quality products that are "Made In Italy." Today,   |
|                 |                             | thanks to our eco-compatible process, we would like to contribute to the  |
|                 |                             | spread of a new "green" style for design and construction that is socially  |
|                 |                             | responsible. A style which has eco-sustainability as a starting point and   |
|                 |                             | which continues towards the development of discerning consumption,  |
|                 |                             | respecting man and the environment.   |
