PRODUCT INFORMATION	TYPE OF PRODUCT	Wood Flooring
	COMPANY NAME	Heartwood Pine Floors
	PRODUCT/COLLECTION NAME	Antique Southern Yellow Pine
	DESCRIPTION	This rich, yellow-toned recycled wood flooring has a lighter patina and takes a stain very well. It is our most economic antique flooring and it will brighten any room.
MATERIAL FEEDSTOCK	MATERIAL CONTENT	Made from 100% reclaimed Southern Yellow Heartpine.
	RECYCLED CONTENT %	100% reclaimed wood, post-consumer recycled
	RAPIDLY RENEWABLE CONTENT %	This is readily available. The company buys old deeds and checks for the mill/grain color of the wood so there is stock of each of their wood types.
	HARMFUL ADDITIVES	There are no harmful additives
	HARMFUL EMISSIONS	This product doesn't produce off gas, it is kiln dried.
	EMISSION STRENGTH OVER TIME	This product stays in it's original status throughout time, no off gassing.
MANUFACTURING	TREATMENTS	There is only a finish that goes on the wood.
	MANUFACTURING PROCESS	Before any antique heartpine can be sent to the saw, all metal must be removed. This is a simple yet arduous task that requires a metal detector and a variety of hand tools. Then it needs to be sawed. Their band saw has a blade over twenty feet in circumference, which allows a reduction of waste and speed production of the lumber reclaiming process. The wood has been slowly air-drying for over one hundred years. They kiln dry the salvaged wood to insure consistent low-moisture content and to make sure the pine resin is set and crystallized at a high temperature. Each board is examined for grain density, color, knots, nail holes and is graded accordingly. Lastly, they are able to mill wood into high-quality antique flooring, stairs, molding, mantles, banisters, paneling and more.
	HARMFUL EMISSIONS	n/a
	LOCATION OF MANUF. PLANT	Manufactured in Chatham County, North Carolina
	TESTS/CODES	There has been no testing for this product but it is reclaimed wood therefore is sustainable.
	3RD PARTY CERTIFICATION	n/a
	INSTALLATION	INSTALLATION PROCEDURE
INSTALLATION ADHESIVES		n/a
UNIT COST		\$4.65 / square foot
LIFE CYCLE ANALYSIS EXTRACTION		n/a
END OF SERVICE LIFE		The company has nothing to do with the flooring after it is shipped out. The dispose of it is up to the owner.
MISC. PROPERTIES	QUALITIES/PROPERTIES OF PRODUCT	Pine is softwood so it is semi-durable.
	MISC. COMMENTS	
	CONTRIBUTION TO LEED POINTS	This product is not LEED certified
COMPANY PROFILE	GREEN PHILOSOPHY	"As part of our ongoing commitment to helping save the environment while making the nation's premier green flooring, our wood chips and sawdust are also recycled as organic soil components." – Heartwood Pine
	CONTACT	1.800.524.7463
MAINTENANCE	AFTER INSTALLATION	Cleaning and care is typical to wood flooring. Can be vacuumed or use wood cleaner, never hot soap and water.
