IAR Library: 09.65.19 RO5 2012 Flooring 09.65.19 2012

PRODUCT	TYPE OF PRODUCT	
INFORMATION		Rubber Tile
	COMPANY NAME	Roppe
	PRODUCT/COLLECTION NAME	Rop-Cord
	DESCRIPTION	Tough and durable as well as environmentally friendly, it can be used
		indoors or outdoors. Rop-Cord's built-in anti-slip feature makes it practical
		for a variety of areas, including damp or wet spaces. So, it's an ideal
		flooring for ramps, walk-off mats, concourses and foyers – anywhere
		moisture might pose a hazard to pedestrians.
MATERIAL FEEDSTOCK	MATERIAL CONTENT	Rubber, Polyester fabric
	RECYCLED CONTENT %	90% post-consumer waste from tires
	RAPIDLY RENEWABLE CONTENT	90% Recycled tires
	%	
	HARMFUL ADDITIVES	None
	HARMFUL EMISSIONS	None
	EMISSION STRENGTH OVER TIME	None
	TREATMENTS	N/A
MANUFACTURING	MANUFACTURING PROCESS	Rop-Cord Vulcanized and Non-Vulcanized are products manufactured
MANOLACIONING	MANO ACTONING THOOLOG	with 90% of the components comprised of recycled truck and bus tires.
		Rop-Cord Vulcanized construction is a synthetic tire cord reinforced with a
		layer of fabric, and then vulcanized to a thin rubber backing.
		Rop-Cord Non-Vulcanized construction is made of a synthetic tire core
		reinforced with a polyester non-woven fabric bonded to a thin-adhesive
		layer. The nylon cord is then buffed to produce an even, non-glare, tufted
		surface. The result is a nominal 3/8" thick tiles that are highly resistant to
		• •
		organic deterioration and damage from the elements.
		We produce mainly SBR rubber products, we use heat, steam and
		pressure to vulcanize the rubber into different forms – wall base, tile or
		stair treads. We are careful to run our lines in as efficient manners as
		possible, which includes initiatives such as running higher use lines during
		off peak hours and recycling our water for the steam function. Our main
		waste management strategy is to eliminate the waste from the cycle.
		However, since that is not always possible, we have implemented a zero
		landfill policy. We utilize the same IMPACT program that is offered to
		customers within our own manufacturing processes and it has been quite
		successful in minimizing, and almost eliminating the landfill option that
		was heavily relied here for many years. I would also add that our small
		community does not offer a public recycling program, but our employees
		are encouraged to recycle their plastics, newspapers, magazines and
		aluminum cans here at Roppe. The monies earned from this effort are put
		into a fund on an annual basis and divided between all of the employee's
		college students. This has been a very lucrative fundraiser for our kids
		who earn at least \$1000 per student each summer for the next school
	HARMFUL EMISSIONS	who earn at least \$1000 per student each summer for the next school

COMPANY PROFILE	GREEN PHILOSOPHY	
		At Roppe, we've consciously decided to be part of the solution.
		That means we're not just committed to making better products - we're
		dedicated to making a positive impact on the environment as well. Our
		"green" products meet high environmental standards and may contribute
		to the U.S. Green Building Council's LEED® Green Building Certification
		System. From tiles and treads to wall base and adhesives, our
		EcoEffects® products meet high environmental standards without
		compromising color selection, performance, durability or style.

MAINTENANCE	AFTER INSTALLATION	Sweep and vacuum to remove dirt and other particulate. Rop-Cord should
		be cleaned weekly to maximize the life of the product. If left unclean,
		sand, grit, and grime on the surface and between the tiles can become
		very abrasive on the wear layer and on the adhesive bond reducing the
		life of the product. Interior flooring may be swept, vacuumed, spot
		cleaned, or shampooed.
