MISC. PROPERTIES	QUALITIES/PROPERTIES OF PRODUCT	10 Year Warranty
	MISC. COMMENTS	N/A
	CONTRIBUTION TO LEED POINTS	MR 6: Rapidly Renewable Resource (50% wool)
COMPANY PROFILE	GREEN PHILOSOPHY	ecofinishes® is dedicated to the idea that the creation of beautiful floors can live in harmony with the preservation of our planet's magnificent resources. From the way the material is harvested to the manner in which it is brought to your doorstep, each of our handpicked products reflects our philosophy. Our engineered hardwood flooring, for instance, is capable of producing many times the square footage of solid hardwood, while sacrificing nothing in performance or aesthetics. Likewise, the recycled or reclaimed materials in our carpet, rubber, and heart pine help beautify homes and businesses rather than clog landfills. And rapidly renewable products like bamboo and cork create striking results with light environmental footprints. At ecofinishes®, we not only promote the vision of a more environmentally friendly world through our product offerings, we apply green principles to our daily lives through office recycling, efficient transportation, and maximum use of digital media rather than paper. Our hope is that each small effort helps make the world a little better than we found it.
