<b>MANUFACTURING</b>	<b>MANUFACTURING PROCESS</b>	With an environmental management system rigorously tailored to the unique aspects of flooring industry, Shaw is increasing efficiency and reducing its environmental impacts for energy, water, emissions, solid waste and pollution prevention. Through these efforts and additional business management strategies, such as Six Sigma and LEAN manufacturing, we have committed to significant improvements within our facilities including: · Energy intensity reduction by 25 percent by 2017 · Waste to landfill reduction by 90 percent by 2011 · Water intensity reduction by 40 percent by 2016  Increasing operating efficiency is a major way that we are reducing our impact. We monitor our processes through the Shaw Environmental System, our specialized environmental management system that monitors and reduces our energy, water, emissions and waste. This system is modeled after the requirements of ISO 14001 while tailoring to fit the specific needs of a carpet manufacturer. All of our commercial carpet manufacturing plants are certified through the SES. Additionally, our carpet tile facility is certified through ISO 14001.
