COMPANY PROFILE	GREEN PHILOSOPHY	In 1974, after much experimentation, we recreated an old Milk Paint formula to provide an authentic finish for our primary business of building reproduction furniture. Since then we have sold our paint to professionals who are either restoring original Colonial or Shaker furniture, making reproductions, or striving for an interior design look that is both authentic and beautiful. Milk Paint is now gaining an even wider usage because it contains only ingredients that are all-natural and will not harm the environment. Our authentic real milk paint is truly a "green paint" that comes in 20 colors.
