MAINTENANCE	AFTER INSTALLATION	Textiles by vacuuming or lightly brushing. Maintain textiles by keeping them away from direct sunlight. Wood: Do not place/leave hot or moist objects directly on the wood. Avoid extreme humidity changes, as extremely dry air can cause wood to crack and lacquer to lift. Do not place near heaters and air conditioning units to prevent over-drying or exposure to excessive moisture. Rubber or plastic left on the wood finish can also damage the finish. There is no guarantee against finishes fading and oxidizing. Care for your wood and lacquer pieces by dusting regularly with a soft cloth. Clean by using a dry or slightly damp soft cloth. Follow by polishing with a dry soft cloth. Do not use commercial, heavy-duty polishes or waxes, as they can yellow light finishes. Leather: Avoid saturating the leather with lotion or water for a long period of time. Care for leather by dusting and lightly vacuuming. Maintain leathers by keeping them away from direct sunlight and heating vents. Leathers are a natural material that breathes and moves as they wear.

		<p>We recommend that stained or soiled leathers be professionally cleaned. Furniture: With the proper care and attention, Bright Chair Company products are designed to give you years of service with little or no maintenance for intended use.</p>
