MANUFACTURING	MANUFACTURING PROCESS	We believe in life cycle thinking-creating products that embrace Design
		for the Environment (DfE) strategies. Our products interface and integrate
		fo more sustainable workspaces. The result is interiors that flex and
		change with an organization and extend the life cycle of work
		environments. Content Selection
		Materials are selected based on recycled content and/or recyclability at
		the end of useful product life. Materials with an existing infrastructure for
		recycling and products designed for easy disassembly are more likely to
		be recycled. We communicate and request our suppliers'
		acknowledgement and support of our prioritized list of restricted materials,
		i.e., materials we want to eliminate over the next five years. Suppliers also
		receive our rated list of 800+ chemicals. The red/yellow/green rating
		identifies green (eco-friendly) choices.
		Wood Certification
		The Forest Stewardship Council (FSC) Chain of Custody (CoC)
		certification allows products to be segregated and identified as having
		come from FSC-certified forests and other controlled sources. Our
		participation as a CoC holder allows us to offer products made of wood
		that come from responsibly managed forests. Haworth issued a wood
		policy in 2008, demonstrating our commitment to eliminate the sourcing of
		unwanted wood sources. Our current strategy is to develop a supply chain for ESC and ESC controlled wood and increase the number ESC CoC
		for FSC and FSC controlled wood and increase the number FSC CoC
		certified manufacturing facilities Low VOC
