MANUFACTURING	MANUFACTURING PROCESS	We believe in life cycle thinking-creating products that embrace Design
		for the Environment (DfE) strategies. Our products interface and integrate
		fo more sustainable workspaces. The result is interiors that flex and
		change with an organization and extend the life cycle of work environments.
		Content Selection
		Materials are selected based on recycled content and/or recyclability at
		the end of useful product life. Materials with an existing infrastructure for
		recycling and products designed for easy disassembly are more likely to
		be recycled. We communicate and request our suppliers'
		acknowledgement and support of our prioritized list of restricted materials,
		i.e., materials we want to eliminate over the next five years. Suppliers also
		receive our rated list of 800+ chemicals. The red/yellow/green rating
		identifies green (eco-friendly) choices.
		Wood Certification
		The Forest Stewardship Council (FSC) Chain of Custody (CoC)
		certification allows products to be segregated and identified as having
		come from FSC-certified forests and other controlled sources. Our
		participation as a CoC holder allows us to offer products made of wood
		that come from responsibly managed forests. Haworth issued a wood
		policy in 2008, demonstrating our commitment to eliminate the sourcing of
		unwanted wood sources. Our current strategy is to develop a supply chain
		for FSC and FSC controlled wood and increase the number FSC CoC

		certified manufacturing facilities.

	END OF SERVICE LIFE	At Haworth we continually review and improve all of our materials and
		processes in order to minimize the impact we make on the overall
		environment.
		We offer the highest number of 100% recycled polyester proprietary
		systems fabrics in the industry. Haworth is implementing water-based
		stains and finishes on all our wood products.
MISC. PROPERTIES	QUALITIES/PROPERTIES OF	The combination of smooth and textured finishes, neutrals and colors,
	PRODUCT	simple and complex weaves, and translucent and opaque materials, gives
		the Surface Collection a wide appeal and visual interest. Our finishes can
		help you design interiors that are classic, transitional, or trendy.
	MISC. COMMENTS	Haworth Pune teams switched to a new method
		for packaging seating products. Instead of putting a fully assembled chair into a box, seating products
		are disassembled for shipment. Fewer parts in a box
