<b>MANUFACTURING</b>	<b>MANUFACTURING PROCESS</b>	<p>We believe in life cycle thinking—creating products that embrace Design for the Environment (DfE) strategies. Our products interface and integrate fo more sustainable workspaces. The result is interiors that flex and change with an organization and extend the life cycle of work environments.</p> <p><b>Content Selection</b> Materials are selected based on recycled content and/or recyclability at the end of useful product life. Materials with an existing infrastructure for recycling and products designed for easy disassembly are more likely to be recycled. We communicate and request our suppliers' acknowledgement and support of our prioritized list of restricted materials, i.e., materials we want to eliminate over the next five years. Suppliers also receive our rated list of 800+ chemicals. The red/yellow/green rating identifies green (eco-friendly) choices.</p> <p><b>Wood Certification</b> The Forest Stewardship Council (FSC) Chain of Custody (CoC) certification allows products to be segregated and identified as having come from FSC-certified forests and other controlled sources. Our participation as a CoC holder allows us to offer products made of wood that come from responsibly managed forests. Haworth issued a wood policy in 2008, demonstrating our commitment to eliminate the sourcing of unwanted wood sources. Our current strategy is to develop a supply chain for FSC and FSC controlled wood and increase the number FSC CoC certified manufacturing facilities.</p>

<b><u>MISC. PROPERTIES</u></b>	<b>QUALITIES/PROPERTIES OF PRODUCT</b>	Haworth North America products are designed and manufactured to provide a long useful life and to withstand repeated service, repair and handling. Standardized parts and components will be made available to facilitate maintenance, service and reassembly where appropriate, in accordance with Haworth Warranty and non-obsolescence policies.
	<b>MISC. COMMENTS</b>	Haworth Pune teams switched to a new method for packaging seating products. Instead of putting a fully assembled chair into a box, seating products are disassembled for shipment. Fewer parts in a box translate to smaller boxes that require less packing materials. Plus, more boxes fit in a shipping container. Fewer shipping containers reduce the number of transport vehicles, which in turn consumes less fuel.
	<b>CONTRIBUTION TO LEED POINTS</b>	LEED® certified facilities and sustainable manufacturing processes
<b><u>COMPANY PROFILE</u></b>	<b>GREEN PHILOSOPHY</b>	Haworth will be a sustainable corporation. We engage our employees in more sustainable practices; we initiate and use processes that are neutral or improve our environment; and we utilize our resources in ways that create adaptable and sustainable workspace solutions for our customers. We do all of this globally to protect and restore our environment, create economic value, and support and strengthen our communities
